Arizona Cancer Registry (ACR)
Required CSv2 Site-Specific Factors (SSF) Table
Collaborative Stage Data Collection System (CS Version 02.03.02)
Effective for cases diagnosed on January 1, 2011 and after

All site-specific factors not ACR required in the table below, must have the not applicable code (988) entered unless your registry decides to code them. If a not applicable code (988) does not exist, code to unknown (999). Consult with your vendor to assist in autocoding these.
