<i>Research/Description:</i> Arizona State University (ASU) has campuses in Tempe, west Phoenix, Mesa and downtown Phoenix. ASU, Northern Arizona University and the University of Arizona established an IRB reciprocity agreement for research projects involving investigators from the three campuses. This agreement allows one campus to become the designated IRB for jointly conducted projects. The IRB is composed primarily of faculty members from disciplines in which research involving human subjects is integral to that discipline's work, researchers whose primary interests are non-scientific, as well members from the community. The human subjects review process is administered through the Office of Research Integrity and Assurance.

<p><i>Research/Description:</i> Banner Health has 21 facilities in seven states. Banner Health Research Administration (BHRA) exists to support the development of research activities conducted by physicians and research investigators at Banner Health hospitals. BHRA maintains oversight of all in-patient research studies performed at a Banner Health hospital including research studies in bariatric, bone marrow transplant, cancer, endocrinology, cardiology, neurobiology/neuroengineering, neurology, obstetrics/gynecology, oncology, pulmonology, primary care, surgery, toxicology, pediatrics, and the use of the Positron Emission Tomography (PET) scanner in brain and Alzheimer's disease research. Banner Health locations throughout Arizona include: Gilbert, Glendale, Mesa, Page, Phoenix, Scottsdale and the Sun Cities. Sun Health merged with Banner Health in September 2008, the facility names have changed: Banner Del E. Webb Medical Center (formerly Sun Health Del E. Webb Hospital) and Banner Boswell Medical Center (formerly Sun Health Boswell Hospital). In addition to Boswell and Del E. Webb hospitals, the operational entities joining Banner include Sun Health Research Institute, Sun Health Medisun, Sun Health Boswell Rehabilitation Center, Sun Health Residence for Alzheimer's Care, Sun Health Residence for Special Adults, Sun Health Olive Branch Senior Center, Sun Health Community Education & Wellness Center and others. The Sun Health Research Institute (SHRI) was founded in 1986 as a private, non-profit biomedical research center dedicated to the study of age-related diseases. Scientists at SHRI have had a significant impact on how physicians diagnose and treat diseases such as Alzheimer's, Parkinson's and arthritis. The Institute also runs a Brain Donation Program, which has provided researchers in Sun City and around the world with brain tissue to aid in their search for the cause and cure of those diseases.</p>

<i>Research/Description:</i> The Indian Health Service (IHS), an agency within the Department of Health and Human Services, is responsible for providing federal health services to American Indians and Alaska Natives. The Phoenix Area Indian Health Service (PAIHS) Office in Phoenix, Arizona, oversees the delivery of health care to approximately 140,000 Native American users in the tri-state area of Arizona, Nevada and Utah. The IHS and the National Institute of General Medical Sciences (NIGMS) of the National Institutes of Health have a joint partnership supporting the Native American Research Centers for Health (NARCH). The NARCH initiative supports partnerships between AI/AN Tribes or Tribally-based organizations and institutions that conduct intensive academic-level biomedical, behavioral and health services research. This funding mechanism develops opportunities for conducting research, research training and faculty development to meet the needs of American Indian/Alaska Native (AI/AN) communities. The Phoenix Indian Medical Center, a 127 bed hospital, provides a comprehensive range of services including anesthesiology, pediatrics, internal medicine, surgery, plastic surgery, obstetrics-gynecology, family practice, emergency medicine, ophthalmology, optometry, ENT, podiatry, pathology, radiology, psychiatry, physical therapy and dental services. There are also subspecialties of gastroenterology, infectious disease, pulmonary and future plans for cardiology. In addition, an entire floor of PIMC is devoted to research conducted by the National Institutes of Health on selected diseases of high prevalence among the southwestern tribes.

<i>Research/Description:</i> Arizona State University, Northern Arizona University, and The University of Arizona are pleased to announce the establishment of an Institutional Review Board (IRB) reciprocity agreement for research projects involving investigators from the three campuses. This agreement simplifies the process of IRB review of collaborative projects by allowing one campus to become the designated IRB for jointly conducted projects. The University of Arizona is the leading public research university in the American Southwest. The UA produces more than \$530 million in annual research and is the state's only member of the prestigious Association of American Universities.
