- 2. The subject matter of the proposed rules:**
- Arizona Revised Statutes (A.R.S.) § 36-136(H)(1) requires the Arizona Department of Health Services (Department) to make rules defining and prescribing “reasonably necessary measures for detecting, reporting, preventing, and controlling communicable and preventable diseases.” The Department has adopted rules to implement this statute in Arizona Administrative Code (A.A.C.) Title 9, Chapter 6. The rules specifying reporting requirements for communicable diseases are in 9 A.A.C. 6, Article 2. The rules covering control measures for communicable diseases are in 9 A.A.C. 6, Article 3. The rules in 9 A.A.C. 6, Articles 2 and 3 contain requirements for the reporting of several conditions that no longer need to be included as reportable conditions and do not contain reporting requirements for other conditions that should be reportable to protect public health. The rules need to be revised to update reportable conditions and their control measures, ensure more accurate tracking and better reporting, and improve the effectiveness of the rules in preventing a significant threat to public health. After receiving an exception from the Governor’s rulemaking moratorium established by Executive Order 2016-03, the Department is revising the rules to address these concerns, account for changes in laboratory methodologies, allow for electronic reporting, and reduce the regulatory burden of the rules. The proposed amendments will conform to rulemaking format and style requirements of the Governor’s Regulatory Review

Council and the Office of the Secretary of State. The Department may add, delete, or modify other Sections, as necessary.
