

CPR UNIVERSITY: A PROGRAM FOR TRANSFORMING SCIENCE INTO SUCCESS ON THE STREET

WWW.CPRU.ARIZONA.EDU

COME TO CPR UNIVERSITY AND LEARN:

- To significantly improve your CPR performance and survival rates using state of the art simulation training and expert instructors
- Latest prehospital cardiac resuscitation science
- Effective application of this science in your agency
- Management of high risk periods in a resuscitation
- How to use crew debriefing to improve care
- How to create a culture of excellence around CPR

WHAT IS CPR UNIVERSITY?

CPR University is designed to take your resuscitation efforts to the next level. It is a program of The University of Arizona and the Arizona Emergency Medicine Research Center

- A hands-on workshop developed on train-the-trainer model
- Key components of High-Performance CPR broken down and reconnected into an integrated team approach
- Developed from experience of agencies in a state that tripled cardiac arrest survival
- Insight into practical implementation issues including:
 - Field training strategies
 - Political considerations
 - Measuring progress
- Opportunity to work with program alumni who have dramatically improved survival after implementing these High-Performance CPR concepts

WHO SHOULD ATTEND: EMS professionals and EMS trainers.

WHEN: March 2nd and 3rd, 2016, 0800-1700,

WHERE: University of Arizona Phoenix College of Medicine Simulation and Innovation Center

Seventh St. and Van Buren St, Phoenix AZ 85004. ([MAP](#))

COST: \$495.00. Includes Resource Training ToolKit, Lunch and Snacks.

Register at www.cpru.arizona.edu.

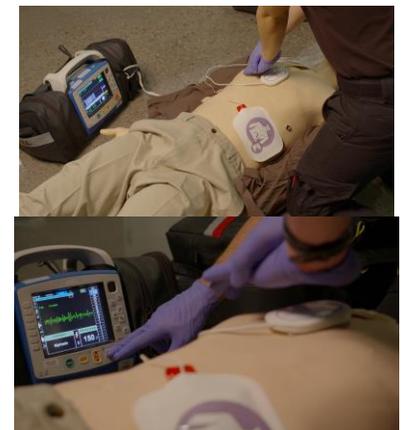

Limited spaces available.

CARDIAC ARREST:

A TIME TO ACT

“Effective treatments for specific types of cardiac arrest are widely available and could reduce deaths and disability if they were more efficiently implemented.”

Strategies to Improve Cardiac Arrest:
A Time to Act.
