

DRAFT ARIZONA CRISIS STANDARDS OF CARE

Desired Future State	Development and implementation of a compassionate and ethically-based healthcare response for disaster situations using crisis standards of care co-developed by key stakeholders.
Vision	Arizona will become a national model in crisis standards of care planning and implementation by February, 2014.
Mission	Provide a framework and standards for response to and recovery from catastrophic disasters that enables optimal community resilience across the statewide healthcare system
Values	<p>Transparency: Providing open, honest, factual and timely communication and information sharing.</p> <p>Consistency: Implementing processes and procedures across the continuum of care; applying the same methodology(s) to achieve optimal community health.</p> <p>Fairness: Supporting respect and dignity for all populations in the provision of healthcare across the continuum of care.</p> <p>Accountability: Taking responsibility for actions, completing work assigned, following through on requests and communications.</p> <p>Resiliency: Providing for the recovery of emotional, spiritual, intellectual and mental health needs and facilitating the wellbeing of the community.</p> <p>Evidence-Based: Formulating decisions on medically founded, state-of-the-art, and research tested (when available) facts and processes to promote optimal community health.</p>
