The Arizona Training and Exercise Plan were supported in part by the CDC Cooperative Agreement, Catalog of Federal Domestic Assistance (CFDA) 93.069 and the Hospital Preparedness Program (HPP) Grant CFDA 93.889. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of CDC or the Department of Health and Human Services.

PROGRAM PRIORITIES

This MYTEP is based on the ADHS Strategic Map, the PHEP and HPP grant guidance, capability assessments, and improvement plans from previous exercises and real world responses. According to the Strategic Map, an overarching goal of this program is to “Promote and Protect Public Health and Safety” by providing training and exercise opportunities for the State’s public health preparedness and healthcare workforce. The following priorities listed in the ADHS Strategic Map are supported by this document:

- Impact Arizona’s Winnable Battles
- Integrate Physical and Behavioral Health
- Promote and Protect Public Health and Safety
- Maximize ADHS Effectiveness
- Strengthen the Statewide Public Health Infrastructure

ADHS Preparedness Training and Exercise Program priorities correspond with the six domains identified in the CDC’s Public Health Preparedness Capabilities. Associated national priorities, capabilities, training, and exercise opportunities are also listed for each priority. These priorities are ranked according to risk assessments and operational gaps identified by PHEP and HPP partners at annual strategic planning sessions and workshops.
