

It's their turn!

Pre-teens need vaccines too!

To be protected.
To be healthy.

Pre-teens 11 - 12 years old need to be protected against serious diseases.

As of September 1st, 2009, students 11 years and older entering 6th & 7th grades in Arizona must be vaccinated against meningitis and whooping cough.

Schedule an appointment with your child's healthcare provider.

For more information, visit www.azdhs.gov/phs/immun;
www.nmaus.org or call your local health department.
