

# COVID-19 Vaccine Boosters

STOP  
COVID-19

These groups are recommended to get a booster dose **6 months** or more after receiving their second dose of **Pfizer's** COVID-19 vaccine:

- Adults age 65 and older
- Those living in long-term care facilities
- Adults ages 50-64 at high risk of severe COVID-19 due to underlying medical conditions

These groups **may** receive a booster based on an assessment of their individual benefits and risks:

- Adults ages 18-49 at high risk of severe COVID-19 due to underlying medical conditions
- Adults ages 18-64 in high-risk professional and institutional settings

These recommendation are **ONLY** for those who originally received the two-dose series of Pfizer-BioNTech COVID-19 vaccine.

**Consult your medical provider with questions.**

Moderna and J&J data is being collected for review of booster doses. More information on booster doses can be found at [azhealth.gov/covid19vaccine](https://azhealth.gov/covid19vaccine).

Please visit [azhealth.gov/findvaccine](https://azhealth.gov/findvaccine) to find a location near you or call our **COVID-19 Hotline** at **1-844-542-8201**.
